

JAVIER GARCÍA GARCÍA

ABOUT ME

My main field of knowledge is computers and technology. I look forward to be constantly learning about different topics, especially Cloud and Containers.

I am a very active person and enjoy social interactions. I am good at establishing new relationships and public speaking events.

SKILLS

App Development

Python	DevOps
C, C++	Git
Kubernetes	CI/CD
Docker	IaC
JavaScript	Agile
React	Data Structures
Html	API management
CSS	Machine Learning

AWS Cloud

Compute	EKS
AI/ML	ECS
Storage	CDK
Analytics	Lambda
Serverless	API Gateway
Networking	EventBridge
Security	Cognito

Soft Skills

Public Speaking	Team Management
Team Work	Creativity

SPOKEN LANGUAGES

- Spanish - Native
- English - C1
- Japanese - B1.2

EDUCATION

- BACHELOR'S IN COMPUTER SCIENCE (BILINGUAL COURSE)
 - 09 / 2020 – 06 / 2024
 - University Carlos III of Madrid.
 - Entrance mark for the university of 13.58 / 14.
 - Average final mark 8.1 / 10.
 - Subjects with mark +9/10: Programming, Computer Technology, Computer Structure, Artificial Intelligence and Applied Differential Calculus, Distributed Systems, Interactive and ubiquitous systems, Machine Learning.
 - Thesis mark: 9.6/10
- BACHILLERATO
 - 09 / 2018 – 07 / 2020
 - Institute: Reinado del Corazón de Jesús, Madrid, Spain.
 - Average mark of 9.88 / 10. Honorable mentions in various subjects such as English or Spanish and Literature. Highest mark of the promotion.
- OTHER COURSES
 - Analysis of investment projects and company valuation by 'Fundación Carlos III of Madrid'.

Certifications

AWS

Cloud Practitioner	EKS
SA Associate	Serverless
Developer Associate	Events and Workflows
GenAI Practitioner	

EXPERIENCE

- Associate Solutions Architect at AWS (September 2024 – present)
As an SA at AWS, I continue to accelerate my expertise in cloud technologies, specializing in Containers and Serverless solutions. I focus on modernizing applications and optimizing infrastructure, driving efficiency and scalability for clients.
- Solutions Architect internship at AWS (June 2023 – August 2023)
Successfully accomplished AWS internship, achieving objectives such as AWS Cloud Practitioner certification, designing and implementing a chatbot for cost optimization, and delivering a presentation to the team.
- Private tutor (January / 2021 – June / 2023)

JAVIER GARCÍA GARCÍA

Key Contributions and Project Highlights

Student Immersion Day - Organizer (AWS)

Led and executed a strategic student engagement initiative across three major Spanish cities targeting university talent in tech fields. Redesigned the traditional full-day format into an optimized half-day program incorporating emerging technologies (GenAI, sustainability) and interactive workshops. Achieved exceptional results including 55% reduction in operational costs, improved participant satisfaction scores from 4.55 to 4.7/5, and generated 45+ immediate applications for technical roles. Successfully expanded the program's reach to emerging tech hubs while maintaining high engagement levels, with 85% of participants indicating they would recommend the event to peers. Implemented innovative social media challenges resulting in 20+ organic LinkedIn posts, enhancing AWS's employer brand visibility in the Spanish academic sector.

Modernizations Tool - Leader (AWS)

Led a strategic modernization framework initiative from concept to implementation, addressing efficiency challenges in enterprise application modernization. Established technical foundation and secured project approval for AWS's Tech-U program. Mentored and guided a development team of three TechU students, transforming the project from proof-of-concept to a production-ready solution through iterative development cycles. Successfully delivered a modernization framework that enables organizations to identify commonalities across their application portfolio, significantly reducing modernization effort and time-to-market. The project exceeded initial goals, gained executive stakeholder approval, and was selected for presentation at a major technical summit, positioning it for beta customer testing. Demonstrated strong technical leadership, mentorship capabilities, and ability to drive innovation while managing both technical and organizational complexities.

Training Enablement Portal - Leader & Developer (AWS)

Led the development of an enterprise-wide training enablement platform. Spearheaded a team of four developers, delivering a MVP with features like SSO authentication, high availability, and +19 API endpoints in 3 weeks. The platform achieved an average of 300ms latency and was praised from stakeholders for its efficiency and functionality.
